Hebrew Psychoanalysis – Minimum to Maximum, while reflecting Life, Also in fact Leibnizian Monadology with a movement on Stress, Job Stress and in fact its Cure as Instant Buddhism, and also Hebrew wisdoms of life
By Shomit Sirohi

I. Instant exercise first

In Buddhism spiritual exercise is a necessary element of removing the stress, it should be then basic theory, that spiritual exercise is like Tai pi Tai Chi which then relaxes a person.

II. Hebrewaisne then

Then of course one can follow Hebrewaisne and it has with it a lecture on quiescence which then is the problem of changing the Mood – it is a world, or compossible world, or even concrescence, and monadological, even minute things like dancing in ballet steps, and organizing the concrescence into a unique answer all of which is singular and singularity in Hebrew ways and conceptions of life. Utopia is then the virtual from whose peculiar view of the monad's point of view will then harmonize and be like a solo from Kirk Hammet in the rise in Halo on Fire, in recent music.

III. Producing a Lecture

In fact lecturing, radio should all be this optimistic about what is in fact a military hurdle and obstacle in a life spent by Sirohi recently. The object-cause of desire, is an obstacle in Foucault, object a is bound by obstacle in speaking, becoming and talking cure. One just has to overcome the limit of speaking – that then is episteme cure. In a way is of course Sirohi's Hebrewaisne.
